- Docker

Education:

University of Toronto

Bachelor of Science: Computer Science

September 2017 - April 2021 |

Toronto, ON

Work Experience:

Moves / Toronto (May 2022 - December 2023)

Junior Software Developer (May 2022 - May 2023)

Intermediate Software Developer (May 2023 - Dec 2023)

- Spearheaded two major front-end mobile application rebrandings to update the overall look and theme to new specifications
- Proposed and delivered a solution to aggregate thousands of data points into weekly and annual views to unlock insights for end users
- Demonstrated a commitment to continual growth by leading and knowledge sharing during front-end skill-up sessions with the engineering team

Index Exchange / Toronto (January 2020 - April 2020)

Software Engineer

- Implemented new internal application for accumulating and forwarding Jira data to Domo - enabling flexible metric calculations and visualizations
- Orchestrated efficient software design, development, and deployment with Docker, including testing features and reviewing code

Technical Projects:

La Room de Discode

- Built a collaborative videotelephony editor using Express, React, Node.js, MongoDB, and GraphQL
- Integrated real time synchronization with a shared Python IDE and shell, as well as video, audio, and chat communication using WebRTC and WebSockets
